Rahul Ashok Jeyalakshmi

has successfully completed the online, non-credit Specialization

Digital Technologies and the Future of Manufacturing

Digital technologies are fundamentally transforming every aspect of the value chain in manufacturing, logistics, and management consulting. In this course series, you'll learn the basics behind some of these breakthrough technologies and their business applications, including improved productivity, quality, and cycle-time benefits within manufacturing and logistics. Challenges and risks for businesses will also be addressed. The content presented in this series draws on a number of real-life interviews and case studies, and was created through a partnership with Siemens.

M.S. Krishnan
Professor of Technology & Operations
Stephen M. Ross Business School

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
