4 Courses

Introduction to Sensory Science

Sensory Science: The Senses

Sensory Science: Measuring the Senses

Sensory Science: Conducting Tests

Sep 10, 2024

Rahul Ashok Jeyalakshmi

has successfully completed the online Specialization

Essentials of Sensory Science

Foundations of Sensory Science explores how to use your senses to evaluate a wide variety of food, beverages, and non-food products- physiologically and psychologically. This specialization emphasizes the chemical senses of taste and smell, and covers vision, hearing, and the tactile senses. Learn how the mind processes sensory information and sensory science creates panels of subjects that perform as an analytical instrument for sensory testing. Understand the complexity of the human sensory system, discuss theories of sensory measurement, scales, quantitative research principles, and psychophysics used in the measurement of perception.

Rebecca N. Bleibaum, M.A.
President/Cofounder of Dragonfly SCI, Inc.
Co-Developer/Instructor for UC Davis's Applied Sensory & Consumer Science Certificate Program

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
